Heyaansh

# Why Heyaansh Secure Tally Terminal?

Move beyond risky one-PC Tally setups and into a controlled, monitored terminal environment.

## OVERVIEW

Most SME Tally setups depend on one office PC, one local server, or one informal IT person; when that system fails, billing, accounts, GST work, and daily operations can stop. Heyaansh Secure Tally Terminal creates a controlled environment where authorised users access Tally and required business files without exposing the full system.

## Why normal PC-based Tally setups fail

### COMMON PC-BASED SETUPS

- ✗ Data stored on one PC
- ✗ Staff can change/install anything
- ✗ No monitoring
- ✗ Manual troubleshooting
- ✗ Local system failure risk
- ✗ Informal backup

### HEYAANSH SECURE TALLY TERMINAL

- ✓ Centralised managed access
- ✓ Locked-down desktop
- ✓ Service health checks
- ✓ Diagnostic logs
- ✓ Managed server-side access
- ✓ Backup-ready structure

## Safer Tally data separation

Server-side data layer

Controlled terminal sessions

Reduced direct exposure of main Tally data files

Lower risk from infected or misused user sessions

## Deployment approach

1

Assess current setup

2

Recommend slot count

3

Run pilot validation

4

Configure controlled environment

Heyaansh

## WHAT YOU GET

# What You Get

A managed, locked-down terminal environment designed for SME accounting teams.

### 1. Centralised Tally access

Serve Tally from a managed environment.

### 2. User-wise access control

Assign access by role and user.

### 3. Restricted app/menu access

Keep the desktop focused and controlled.

### 4. Remote desktop access

Support office, home, and branch usage.

### 5. Backup-ready structure

Designed for disciplined backup workflows.

### 6. Health monitoring

Track service health and key issues.

### 7. Support & diagnostics

Diagnostic-ready support when problems occur.

### 8. Printer/PDF workflow validation

Validate print and PDF paths during deployment.

## Slot-Based Pricing

From  
**₹1,440**  
/ slot / month

- ✓ 1 slot = 1 active remote desktop session at a time
- ✓ One-time setup charges apply based on users, data size, printing/PDF workflow, backup requirement, remote access, and existing system condition
- ✓ Tally license/subscription is not included
- ✓ Prices exclusive of GST

## WHO THIS IS FOR

Manufacturers

Traders & Distributors

CA Offices

Branch Offices

SMEs with old PCs

Business Owners

# Ready to lock down your Tally setup?

Talk to the Heyaansh IT team.  
Share your accounts workflow, slot count,  
and existing setup — we will recommend  
the right **Secure Tally Terminal** plan.

## Built as a locked-down managed terminal environment

Firewall-first  
approach

Intrusion  
visibility

Anti-malware  
and IDS layers

XRDP session  
startup guard

SSL expiry &  
permission checks

Service health  
monitoring

Update drift  
correction

Backup-ready  
deployment

## How We Deploy

1

Understand  
current Tally,  
users, data,  
printer/PDF,  
and backup  
workflow

2

Recommend  
slot count  
and server  
setup

3

Run pilot  
user  
validation

4

Configure  
locked-down  
terminal  
environment

5

Verify Tally,  
printing/PDF,  
remote access,  
and backup  
path

6

Enable  
monitoring,  
update guards,  
and support  
workflow
